# **25kW Battery Cabinet vs Lead-Acid Battery**

## Overview

---

Lithium-ion (LiFePO<sub>4</sub>) rack batteries outperform lead-acid counterparts in energy density (150-200 Wh/kg vs. 30-50 Wh/kg), cycle life (3,000-5,000 cycles vs. This is the seventh in a series of units that will educate you on the part played by a battery in an uninterruptible power supply (UPS) system. The following. The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries. They maintain stable capacity below -20°C to 60°C and achieve 95% round-trip efficiency. The judgement to mount batteries on racks or cabinets must be determined slightly earlier while making a UPS design. Battery Technology: The Vented lead-acid battery. Highly efficient, easy-to-deploy 25 kW, 208 V 3-phase UPS that brings best-in-class power protection to edge, small and medium data centers, as well as to critical infrastructure in commercial and industrial applications. Concerning maintenance, the proactive approach reaps rich benefits over a reactive.
