# **Albania energy independence**

## Overview

---

Albania is on track to achieve full energy independence and become a net exporter of electricity within this decade, Prime Minister Edi Rama announced today. According to him, within this decade, Albania will be energetically and fully independent from any external developments. “Even if we had the energy sector situation as it was before this transformation, the facts would still be meaningful and make us very optimistic about the future of the sector. The statement came during a high-level event in Fier highlighting major achievements in energy production, diversification, and. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. Some of these energy sources are used directly while most are transformed into fuels or. Albanian Prime Minister Edi Rama said on Tuesday that with the launch of several projects and the development of innovation, Albania will not only have sufficient energy but will also become an energy-exporting country. Speaking at an event in Fier, Rama said the country's efforts to diversify its energy.
