# **Algeria solar panels move**

## Overview

---

Algiers, Algeria | In a staggering leap that underscores Algeria's accelerating pivot toward renewable energy, the country imported 850 megawatts of Chinese-manufactured solar panels in the first half of 2025 — an eighty-five-fold increase compared to the same period in 2024, when. Algiers, Algeria | In a staggering leap that underscores Algeria's accelerating pivot toward renewable energy, the country imported 850 megawatts of Chinese-manufactured solar panels in the first half of 2025 — an eighty-five-fold increase compared to the same period in 2024, when. The country is now making a smart move towards renewable energy, with its immense solar power potential at the forefront. And honestly, it makes perfect sense. Algeria is practically swimming in sunshine—we're talking some of the highest solar irradiance levels you'll find anywhere on the planet. Algeria has long limited the use of solar to villages in the Sahara, but two large-scale tenders for 3 GW of generation capacity are expected to change that. By including a local content clause, the North African nation aims to build an industry around renewable energy. Algeria's renewables capacity has gone nowhere since the country added 300MW of solar PV in 2016-17. 5 gigawatts of solar capacity in 2025, marking a record 54% year-on-year increase.
