American Standard Off-Grid Inverter

Overview

The 8kW low voltage split-phase off-grid inverter is designed for off-grid home and commercial applications, providing a stable 120/240V split-phase power output that complies with US standards. The inverter is able to provide reliable power support for large appliances and systems while ensuring. From small cabins in remote areas to fully autonomous homes and even commercial setups, off-grid systems allow you to generate and manage your power without reliance on the traditional utility grid. It can intelligently adjust the work priority, communicate with home lithium batteries, and can also increase output power through multiple. Kangweisi American Standard off-grid inverters have shown broad application prospects in many fields such as homes, RVs, agriculture and even industry.
