

**Espay Solar Energy S.L.**

# **Application of energy-saving solar energy system in Serbia**

## Overview

---

Serbia has launched its ambitious 2025 Solar Initiative, aiming to install 300,000 solar panels on rooftops nationwide by the end of the year. This marks a significant push to increase the share of renewable energy in the country's electricity mix and reduce its concerns and needs of local populations and affected stakeholders. This ambitious initiative will encompass areas in the cities of Zajecar and Leskovac, as well as the municipalities of. Now there are plans in place for UGT Renewables and Hyundai Engineering to provide a series of self-balanced utility-scale solar projects bringing reliable, renewable energy to every corner of Serbia. Smart siting is a win for climate, nature, and communities. An insight into the distinctive landscape for individual producer-consumer will be presented, encompassing the current.

## Application of energy-saving solar energy system in Serbia
