# **Are photovoltaic panels easy to break down**

## Overview

---

Built to withstand years of wind and weather, solar panels are designed for strength and are not easy to break down. It's hard work soaking up sunlight to generate clean electricity. Photovoltaic (PV) modules require regular maintenance, so while solar is passive, you don't get to be. But recycling it. At the National Renewable Energy Laboratory (NREL) in Golden, Colorado, teams of scientists and researchers spend large parts of their day jumping on, twisting, smashing, and generally coming up with various ways of breaking solar panels. It's not malice, it's not incompetence.
