

Espay Solar Energy S.L.

Are there subsidies for farmers to build photovoltaic panels

Overview

The REAP grant is part of the USDA's Rural Energy for America Program. It provides financial assistance to farmers and rural small businesses who want to install renewable energy systems, including solar panels for farms. But first, what's this about “photovoltaic” initiatives?

A photovoltaic system (PV system) is a more scientific word for the typical solar panel (or PV module) system we think of when we. “Our prime farmland should not be wasted and replaced with green new deal subsidized solar panels. It has been disheartening to see our beautiful farmland displaced by solar projects, especially in rural areas that have strong agricultural heritage. Energy audits can identify the best solar solutions and potential savings. Farmers can choose. Based on feedback, USDA and DOE recommitted to working together and developed an approach to addressing the needs of farmers and community priorities while also enabling a greater diversity of energy options. This blog will explain how the program works, who qualifies, and how.

Are there subsidies for farmers to build photovoltaic panels
