# **Asian Hybrid Energy Storage Project**

## Overview

---

Developed jointly by CHN Energy New Energy Technology Research Institute and CHN Energy Ningxia Branch, this pioneering initiative is China's first hybrid grid-forming energy storage project. It is implemented at the Ningxia New Energy Shuguang Phase I Energy Storage Station. The hybrid energy storage project, titled "Lithium Battery + Supercapacitor Hybrid Energy Storage Key Technology Research and Demonstration", at CHN Energy Ningdong Photovoltaic Base in Ningxia recently achieved grid-connected operation. This work is available under the Creative Commons Attribution.

Clean energy technology innovations are continuously breaking records but to capitalise on them and unlock the gains of the clean energy transition, it is essential to accelerate the investments in grid flexibility and storage. In the last decade, we have witnessed tremendous advancements in clean energy technology. The world is experiencing high growth in population and energy demand. The report explores opportunities and challenges related to these technologies and solutions.

[Bangkok, Thailand, 30 Apr 2025] Huawei Digital Power is set to unveil its cutting-edge Hybrid-Cooling Energy Storage System (ESS) at the C&I Future Energy Summit Asia Pacific 2025 in Bangkok, Thailand. This summit, happening on Apr 30, will feature a series of pivotal sessions designed to explore the latest in clean energy technology.
