The European research project NEXTBMS (NEXT-generation physics and data-based Battery Management Systems for optimised battery utilisation) coordinated by the AIT Austrian Institute of Technology aims to develop an advanced battery management system (BMS) on the basis of fundamental. The EU is aiming to become climate neutral by 2050 and batteries play a crucial role in this transition to clean energy. The electrification of the European economy and society, both in the transportation sector and in stationary storage systems, has led to rapid growth in the European battery. As part of our "local to local" strategy, our goal as Austria's technologically leading battery manufacturer is to open additional VOLTFACTORY® locations worldwide. With an area of more than 3,900 square meters, the VOLTFACTORY® is the Miba Group's battery pilot and flagship plant. The goal is to. Our core competency at e. battery systems is making innovative strides forward in electromobility applications. Austrian Power Grid Battery Energy Storage Systems Key.
