

**Espay Solar Energy S.L.**

# **Battery energy storage system in Peru**

## Overview

---

Energy storage technologies, especially lithium-ion battery systems, act as a “backup buffer” for Peru's grid. They capture excess electricity during peak generation—such as midday solar production or periods of high hydropower output—and release it when demand spikes or traditional. NHOA Energy, a subsidiary of NHOA Group, has successfully commissioned a 31 megawatt-hour (MWh) battery energy storage system for Engie Energía Perú's ChilcaUno thermoelectric power plant in Chilca, Peru. The project represents an important milestone in the innovation and development of battery storage systems in the Peruvian. Summary: Peru's energy sector is undergoing a transformative shift, with independent energy storage projects taking center stage in national renewable integration plans.

## Battery energy storage system in Peru
