

Espay Solar Energy S.L.

Belgrade home solar power system

Overview

As cities worldwide push toward renewable energy adoption, Belgrade has emerged as a frontrunner with its innovative photovoltaic energy storage system connected to the grid. This project not only addresses energy reliability but also showcases how urban centers can integrate solar. In Batajnica, near the highway to Novi Sad, an unusual solar power plant with a capacity of 10 kilowatts has recently been put into operation. The plant has been in operation for nine months now. Two months ago, it also obtained official status as a prosumer (buyer-producer) of electricity. It is an important milestone in CMS Belgrade's. In cooperation with the sister company EPCG Solar Gradnja, we promote installation of new solar capacities, we provide services and prepare projects related to renewable energy sources, and we connect small solar power plants to the system. In Belgrade, the capital of Serbia, solar panels use is on the rise.
