

# Breakage on photovoltaic panels

BMS Wiring Diagram

## Overview

---

Dual-glass PV modules are experiencing low-energy glass fracture under expected conditions of use at an alarming rate. But from Texas to Thailand, the same problem is appearing: broken glass. In cases seen by Jörg Althaus, director of. We have seen cases of the glass in solar panels (photovoltaic [PV] modules) breaking differently, and more often, than it did 5 years ago. In a feature article for PV Tech Power (Q3 2025), David Devir, principal engineer for VDE Americas, looks at the origins of today's oversized PV module glass problem and considers. Modern PV modules often use thinner glass to reduce weight and material costs which lead to glass breakage. Glass breakage is a growing concern for the solar power plant operators. CEA conducted comprehensive on-site inspections and structural assessments, which pointed to possible issues related to module durability and mounting system compatibility.

### Tough Break: Many Factors Make Glass Breakage More Likely

Several changes have increased the risk of glass breakage. But there is probably no single change that is responsible for the problem. Here, we summarize our observations and thoughts on PV glass breakage in ...

### 10 Common Ways Solar Panels Break (And How To Protect Them)

From micro-scratches that slowly decrease efficiency to large-scale accidents that immediately cut off power generation, so much can go wrong and with little warning. Here are the common ways

## Identifying and Validating Root Causes of Glass Breakage in PV Modules

A solar project developer engaged CEA to investigate widespread glass breakage across multiple PV sites. CEA conducted comprehensive on-site inspections and structural assessments, which pointed to ...

### Solar panel breakage on the rise as glass thickness decreases and hail

In this year's annual PV Module Index Report by the Renewable Energy Test Center, experts explain how the trend toward ultralarge and ultrathin solar installations is leading to an increase in ...

### Solar module glass is 'spontaneously breaking' in the field

Yes, the sixth annual PV Module Index Report from RETC had some troubling findings, headlined by reports that spontaneous module glass breakage in fielded projects is increasing.

### Top 5: Factors Responsible for Glass Breakage in Solar Modules

Modern PV modules often use thinner glass to reduce weight and material

costs which lead to glass breakage. Glass breakage is a growing concern for the solar power plant operators.

## Understanding and preventing PV module glass fracture

PV module glass breakage has long been an observed failure mode in fielded solar projects. In recent years, however, the nature and causes of solar glass fracture have changed in alarming and ...

## Solar modules under pressure: The growing risk of spontaneous glass

Once considered isolated incidents, spontaneous glass breakages in solar modules are becoming more frequent, highlighting the limits of some manufacturing choices and the need for closer
