Can Japan install solar panels

Overview

All new detached houses in Tokyo after April 2025 are required to have solar panels installed. However, if you are purchasing a property in a different part of Japan, it's possible that solar panels may not be mandated in the region. If you're planning to get a new house or are considering getting solar panels, this guide will provide you with the essential information to help you. To encourage the generation of renewable energy, the Tokyo Metropolitan Government introduced a regulation mandating the installation of solar panels on the roofs of new detached buildings starting in April 2025. The new regulation, which also covers larger apartment and commercial buildings, marks a significant step in the country's efforts to. Plug-in PV systems, however, allow residents of rental housing and multi-family dwellings—those without rooftop rights—to generate their own solar power without complicated procedures. This directive is a key part of the city's comprehensive strategy to achieve net-zero carbon emissions by 2050.
