

**Espay Solar Energy S.L.**

# **Can photovoltaic panels be placed on the ground with feet**

## Overview

---

The short answer is yes—solar panels can absolutely be mounted on the ground, and in many cases, they can even outperform rooftop systems. Depending on your choice of racking system, the solar panels will be positioned a few inches to several feet above the ground. A pole-mounted system can use a single-axis or dual-axis system to follow the movement of the sun to maximize sunlight capture. In most cases, it's easiest and most cost-effective to get a rooftop solar system. But if rooftop solar won't work for your home, ground-mounted systems offer some clear benefits. We will also be discussing.
