# **Can photovoltaic solar panels be used in houses**

## Overview

---

The short answer is yes – a fully solar powered house is not only possible but increasingly practical for most homeowners. Modern solar technology has reached a level of efficiency and reliability that makes complete grid independence achievable in virtually any climate. Is my home suitable for solar panels?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. Dramatic Cost. If you want to use solar power for your home, your options include buying a system, leasing a system, or signing an agreement to buy solar power. Before you agree to anything, know what you're getting. Depending on the option you choose, you might get certain tax breaks or need to take extra steps. The installation cost of solar panels and electricity bill savings depend on local electricity rates, the solar company you choose, how much sunlight your roof gets, and the rebates and tax incentives available near you.
