Can the IKEA eight-grid storage cabinet bear weight

Overview

Ikea's Besta cabinets are designed to hold up to 33 lbs per shelf in a regular situation, and up to 66 lbs in a reinforced set-up. It's recommended to distribute the weight evenly along the shelf and make sure to mount the cabinet securely to the wall with the included mounting. Products have tested weight limits. Please refer to the product's web page or assembly instructions for specifications. I'm thinking of getting a fish tank. A twenty gallon tank, when full of water, weighs 160lbs. I would place it atop this: <https://www.com/us/en/p/havsta-cabinet-with-base-white-10388623/> Would this be able to support that weight?

Probably it would warp. IKEA products are tested for normal load-bearing capacity for domestic use according to North American standards. For. Is it just me, or is it now impossible to find the weight limits of products on Ikea's website. I've got my eye on the HÄLLAN - does anyone have.

Can the IKEA eight-grid storage cabinet bear weight

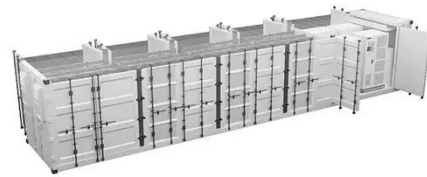

What is the weight limit for IKEA products?

IKEA products are tested for normal load-bearing capacity for domestic use according to North American standards. In some cases, IKEA has even higher product requirements than North American standards.

Question on weight limit of a cabinet. : r/IKEA

Probably not. Literally no one recommends an IKEA cabinet for fish tank support. Not without reinforcing.

Are there weight capacity for products?

Certain chairs, shelving units, shelves, beds, and children's products have tested weight limits. Please refer to the product's web page or assembly instructions for specifications.

Do your products have tested

weight limits

Certain chairs, shelving units, shelves, beds, and children's products have tested weight limits. Please refer to the product's web page or assembly instructions for specifications.
