Climate change kuala lumpur

Overview

Kuala Lumpur, the capital city and economic hub of Malaysia, is leading efforts to mitigate climate change amidst rapid economic growth. Kuala Lumpur City Hall (KLCH) has set a target to reduce GHG emission intensity by up to 70% by 2030. The Paris Agreement of 2015 sets out a global framework to limit global warming to well below 2°C, preferably to 1.5°C (degrees Celsius), compared to pre-industrial levels. To achieve this global temperature goal, countries aim to reduce growth of greenhouse gas emissions as soon as possible and. Kuala Lumpur is advancing its Climate Action Plan, as energy use in buildings—responsible for 78% of emissions—remains a critical challenge. This suggests improved conditions, with more favorable environmental indicators and a reduction in negative impacts. Over the past. w Carbon Society Blueprint 2030. It is also our duty to create a city where the physical. Datuk Seri Maimunah Mohd Sharif said the Urban Climate Resilience Programme marks a bold step towards localising climate goals by empowering communities to co-create solutions for a changing environment.
