Overview

Visit the Global Website or select your region below. Organizations should start by fully understanding their total compute and storage needs and account for near- to mid-term expansion requirements to determine the size and style of server racks required. Also, consideration should be paid to rack cooling strategy, power technology, and rack security. Data centers today are faced with the emerging demands of AI, requiring scalable, efficient and high-performance solutions to handle both mainstream and accelerated workload demands. Perfect for the server room or today's modern data center, HPE G2 Advanced Series Racks include a 3000 pound static capacity, design for better air flow, and cable management features. This creates a perfect storm of heat-related problems: Cable Congestion: Thick bundles of traditional copper cables act like a wall, blocking cold.
