# **Delivery time for 50kW solar energy storage cabinet for agricultural irrigation**

## Overview

---

Total operating time is 720 hours, with energy costs alone amounting to  $500 \times 720 \times 0$ . When factoring in demand charges and other surcharges, the total cost is projected to rise to over \$50,000 to \$60,000. Our systems range from 20kW to 100kW, tailored to meet the high energy demands of modern ag. At Sunchees, we provide robust solar systems designed for agricultural environments, including farms, ranches, and barns. Designed to meet the growing demand for efficient and reliable energy storage, this system combines high performance with a compact, integrated design to support a wide range of commercial and. Discover how a 50kW solar PV array combined with a 400kWh high-voltage battery storage system and a Solis S6 hybrid inverter can transform energy use on farms and agricultural sites. Operating around the clock. 50kW and 125kW energy storage power modules, support on or off grid mode, air-cooled battery or liquid-cooled battery optional, has transformer, has STS module to achieve 10ms seamless switching. Designed for peak shaving, backup power, and solar.
