# **Dimensions of photovoltaic panel 405**

## Overview

---

On average, 405 w solar panels are around 78x40 inches. However, as for residential use, they may not fit onto every house roof. The JA Solar JAM54S31-405/MR/1500V module utilizes monocrystalline PERC cells in a half-cell configuration, offering 405W of power output for both residential and commercial solar installations. Built with an 11 busbar design, this panel delivers reliable performance across various light conditions. Easily find out what solar panels cost in your area Your information is safe with us.
