Electric vehicle safety amman

Overview

AMMAN — Jordan's transportation sector is witnessing a “rapid” shift towards electric vehicles (EVs), driven by technological advancements, increased environmental awareness and a national effort to reduce dependence on traditional fuels. Alongside environmental benefits, the development of smart. Ammon News - Minister of Environment Ayman Suleiman underlined the importance of integrating electric vehicle (EV) battery management into Jordan's green growth initiatives, noting that partnerships with the private sector have helped advance comprehensive solutions to reduce the carbon footprint. The Jordanian Standards and Metrology Organization (JSMO) announced on Monday the implementation of new procedures for the conformity assessment of electric vehicles for the year 2024. With the concerns about climate change and the growing demand for sustainable transportation options, EVs have emerged as a promising solution in the Kingdom.
