

Espay Solar Energy S.L.

Energy storage container spreader deadweight

Overview

Handles heavy loads: Strong power for very heavy containers or tough jobs.
Tough in bad conditions: Works well in dusty or wet ports if seals are good.
These carriers are designed to straddle containers, lifting them from above using a spreader bar and moving them across short distances within the terminal. Container spreaders are fixed to hooks of items such as a gantry, bridge, and portal cranes. The telescopic and lock/unlock actions of the electric single-container telescopic spreader are. In Port Loading and Unloading: Beside the berths in ports, the MAXTECH container spreader can quickly transfer containers from ships to the dock with its rapid lifting and lowering mechanism.

Energy storage container spreader deadweight
