Energy storage power reform

Overview

In several regions, there are substantial opportunities for reforms that will enable energy storage to participate in boosting the reliability and resilience of our power grid - while also alleviating utility bill impacts from historically high capacity prices. Ap— Today the American Clean Power Association (ACP) released an Energy Storage Market Reform Roadmap and analysis produced by the Brattle Group, outlining several key reforms that regional grid operators can enact to leverage the unique capabilities of energy storage. China's new electricity pricing mechanism, introduced in January 2026, represents a fundamental shift to compensate power plants based on their role in grid stability amidst renewable energy transition. Highlighting ERCOT and CAISO successes—where storage saved Texans \$700M in summer 2024 and mitigated California. During the summer of 2024, Texas faced record-high electricity demand, and energy storage resources helped residents save over \$700 million while ensuring a stable power supply. In California, energy storage reduced the risks of power outages and voltage drops, playing a crucial role in preventing. We identified 5 priority reforms in the following target markets: MISO, NYISO, and PJM. Prioritized reforms address the limits of conventional market.

Energy storage power reform

US Energy Storage Market Reform Roadmap Proposed by Clean Power

The American Clean Power Association (ACP) has released the Storage Market Reform Roadmap, which recommends that U.S. grid operators implement market reforms that support ...

ACP Releases Energy Storage Market Reform Roadmap to Unlock

...

The American Clean Power Association (ACP), in collaboration with The Brattle Group, has released a comprehensive Energy Storage Market Reform Roadmap, highlighting key reforms ...

PJM, MISO, NYISO ripe for energy storage market reforms: Brattle/ACP

The proposed reforms would boost energy storage value, market efficiency and system reliability as intermittent renewables penetration increases and fossil plants retire, the groups said

American Clean Power Association

Report: Market Reforms to ...

The American Clean Power Association (ACP) has released an Energy Storage Market Reform Roadmap and analysis produced by the Brattle Group highlighting several reforms for ...

ACP recommends energy storage reforms in US RTO, ISOs

Clean energy trade body American Clean Power Association (ACP) has released a report on energy storage market reforms for regional grid operators based on findings from the Brattle Group.

New Report: Market Reforms to Harness Energy Storage and ...

While some regions of the United States have made progress integrating energy storage into energy resource portfolios, several organized electricity markets have yet to unlock the benefits ...

US states advance energy storage and grid reforms in Q2

The "50 States of Grid Modernization" quarterly report from NC Clean Energy Technology Center identified policy trends related to US grid modernization

across the 2025 legislative session.

Initial Findings From 5 Reforms for the Market Design Roadmap

We identified 5 priority reforms in the following target markets: MISO, NYISO, and PJM. Among an array of reforms considered, these unlock the largest value at scale while exhibiting a feasible policy and ...

China's New Capacity Electricity Pricing Mechanism: What It Means

...

Key Points China's new electricity pricing mechanism, introduced in January 2026, represents a fundamental shift to compensate power plants based on their role in grid stability amidst ...
