## Overview

---

Load Serving Entities (LSEs) must adjust resource plans to meet the new requirements that start in 2025. However, current NIB technology still falls short of established LIB systems, such as those based on LiFePO<sub>4</sub>, in. Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. The first battery, Volta's cell, was developed in 1800. pioneered large-scale energy storage with the. In April, the CPUC approved updates to its Resource Adequacy (RA) program, including implementation guidelines for the 24-hour slice-of-day (SOD) methodology. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an.
