

**Espay Solar Energy S.L.**

# **Enter the solar power plant by boat**

## Overview

---

Indian boatbuilder NavAlt Solar and Electric Boats has completed construction of the fourth vessel in a series of catamaran ferries fitted with photovoltaic panels. The solar-powered ferry will be operated primarily in Sukna Lake in the city of Chandigarh in Punjab state. Enter solar panels—a modern twist that seamlessly integrates technology with the timeless elegance of sailboats. Picture yourself out on the open water, the wind in your hair, and the only. Today, you have eco-friendly and cost-effective solutions in solar-powered boats. Many find them beneficial in compensating their energy needs against harsh waters. Whether to gain autonomy, ensure reliable electrical supply on board, or reduce dependence on equipped ports, installing solar panels on a boat meets practical needs, far beyond simple. The Kerala State Water Transport Department (SWTD) operated approximately 100 ferry boats of varying sizes, accommodating 75 to 100 passengers across the state. These boats, constructed from wood or steel, were all single-hulled and propelled by diesel engines. Image credit: PSCopywriting In fact, it's pretty rare these days to see any type of boat that doesn't have a solar panel installed.
