

Espay Solar Energy S.L.

French hair dryer with solar panel manufacturer

Overview

Since 1936, Velecta® Paris has designed, manufactured and marketed ultra-efficient, eco-responsible hair dryers for the whole world that respect the working conditions of the most demanding professionals and the most discerning consumers. The number one global brand of professional hair dryers made in France. However, solar energy can power hair. Hairdryers are products that have high energy consumption and thus were among the first product on which Groupe SEB has worked to improve energy efficiency and reach carbon neutrality by 2050. This expansion is primarily driven by hospitality sector adoption, where hotels and resorts integrate solar-powered devices to meet sustainability certifications like LEED.
