Generac power cell solar system

Overview

The Generac PWRcell is a solar battery that stores energy generated by solar panels and provides backup power during a grid outage. The PWRcell also allows homeowners to take advantage of Time of Use (TOU) energy plans by using the battery's stored energy during peak hours when rates are high. PWRcell 2 lets you use solar and battery at the same time and allows a generator to recharge the battery, maximizing home backup power. Adding 22 solar panels, including installation, costs \$29,000. And you'll have room for an upgrade, too.
