Chemical Storage Guidelines

General Storage Requirements
 Storage in Refrigerators and Freezers
 Secondary Containment
 Use secondary containment, such as polyethylene or stainless steel trays, to separate incompatible chemicals stored in the same area and to provide spill containment. Provide secondary containers for storage of solvents and concentrated acids and bases. Use secondary containers during storage of all hazardous chemicals on the floor. See more on [ehs.oregonstate.edu](https://ehs.oregonstate.edu/standards/chemical-storage) [PDF]
