# How big is the installation hole for photovoltaic panel connection wire

## DETAILS AND PACKAGING

1 USER MANUAL PDF

2 RJ45 Cable For RS485/CAN

3 Battery in Parallel Cables

4 RJ45 TO USB Monitor Cable

5 M8 Terminal\*4

## Overview

---

The most commonly used wire gauge connecting solar panels is 10 AWG. Why 10-American-Wire-Gauge (AWG) is selected as the standard for external connection of solar arrays due to the following: Consider water flowing through a hosepipe. If the wires are too thin or improperly sized, you risk suffering significant energy losses, which directly translates into reduced return on investment (ROI). Worse still, improper. Proper solar panel wire sizing is critical for system safety, efficiency, and compliance with electrical codes.
