

**Espay Solar Energy S.L.**

# **How many months will the electricity bill for photovoltaic panels be settled**

## Overview

---

Take your monthly usage and multiply by 12 months, or gather a full year's worth of bills from your utility for a more accurate estimate. Let's calculate a few different payback scenarios. Scenario #1: US national average electricity rates, installed by a contractor at \$1/watt. Regional Payback Variations Are Extreme: Solar break-even periods range from just 2.4 years in Hawaii to nearly 20 years in Utah, primarily driven by local electricity rates and state incentives. However, in some states, the payback period can be as short as five years or as long as 15. Though solar is a big purchase up front, that investment. Solar panels probably won't erase your bill, but they can still save money. Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in which. Installing solar panels is a major home improvement project, and like any large purchase it is wise to understand when the investment begins to return value. How quickly your solar panels pay.
