# How many watts of solar power are installed in Greece

**LPSB48V400H**  
**48V or 51.2V**

## Overview

---

Broad development of solar power in Greece started in the 2000s, with installations of skyrocketing from 2009 because of the appealing introduced and the corresponding regulations for domestic applications of . However, funding the FITs created an unacceptable deficit of more than €500 million in the Greek "Operator of Electricity Market" RES fund. To reduce that deficit.

---

### Renewable energy in Greece

The country aims to double its renewable energy capacity by 2030, which is expected to grow from 14 gigawatts in 2022 to 28 gigawatts in 2030. Discover all statistics and data on Renewable

### Greece adds record solar power capacity in 2023 amid growing ...

According to a new report by industry association Solar Power Europe, Greece's total installed capacity last year grew by 20% with 1.6 Gigawatt of installed capacity added.

### Greece Rooftop Solar Country Profile

In terms of the current status, there are currently 375 MW of small-scale rooftop PV panels (<10 kW), accounting for 5.8% of the total installed PV capacity of 6.3 GW.

## How many watts of solar power are installed in Greece

According to a new report by industry association Solar Power Europe, Greece's total installed capacity last year grew by 20% with 1.6 Gigawatt of installed capacity added.

### **Greece adds record 337 MW of solar power in July**

Greece added 921 MW of PV installations in the first half of 2024, followed by an all-time monthly high of 337 MW in July.

### **Greece installs 2.6 GW of PV capacity in 2024**

The Greek parliament passed a law in 2024 requiring all renewable energy plants larger than 400 kW to install equipment that allows the distribution grid operator, HEDNO, to remotely ...
