IP54

Overview

Solar panel installation cost averages \$27,181 for a standard home, with most homeowners spending between \$18,351 and \$36,409. Prices vary based on system size, panel type, and installation complexity. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. How much do solar panels cost on average?

As of 2026, the average cost of residential solar panels in the U. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). Cost will vary depending on. Total cost depends on everything from the type of panel to the size of the system to the complexity of the installation. Incentives also change from one state to another, shaping the final price dramatically. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans.
