According to the Solar Energy Industry Association, a new solar panel installation occurred every 39 seconds in 2026. Are you thinking about generating all or part of your household electricity from sunlight?

If so, you've probably wondered how home solar panel installation works. So the average American home, which uses about 900 kWh of energy per month, may need around 8 kW of solar to offset its energy usage. That 8 kW (8,000-watt). Installing a solar panel system is a significant step towards energy independence and a more sustainable lifestyle. While hiring a professional installer is an option, a do-it-yourself (DIY) approach can be a rewarding and cost-effective alternative for those with the right skills and preparation.
