# **How to start the power supply of solar inverter**

## Overview

---

A step by step guide for turning on, shutting down or restarting your inverter safely. Step 1: Locate your meterbox or switchboard and locate the "main switch inverter supply" and turn that to the ON position. (Some times there will be a DC. Setting up the inverter of a solar system is a critical step in ensuring your system runs smoothly and efficiently. Whether you're installing a solar system for your home, business, or a larger-scale project, the inverter plays a key role in converting the direct current (DC) from your solar panels. In this informative video, we will walk you through the step-by-step process of setting up an inverter for your energy needs. Your solar PV system should now be completely switched off. All lights and screen displays.
