

**Espay Solar Energy S.L.**

# **Is it safe to pull the photovoltaic panels with ropes**

## Overview

---

It is particularly effective for attaching ropes to the frames or structures supporting solar panels. However, care must be taken, as the clove hitch may slip under heavy loads or when the angle of the pull is not directly aligned with the support. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! I finished installing my DIY solar system grid tie 7. For the first 16 panels I run a steel cable. Grab a rope and pull it back to safety. But hold your horses (or should we say, hold your kilowatts?

) - this seemingly simple solution could turn your clean energy investment into shattered glass confett HOME / Is It Safe to Pull a Photovoltaic Panel With a Rope?

Let's Unplug the Truth Is It Safe. On a ranch style home (or any roof that is between 6' and 18. 5' from grade), fall arrest is not usually compatible because you don't have enough vertical height to allow the fall arrest equipment to deploy, meaning you'll hit the ground before your PFAS does it's job. It's critical to put your safety first throughout the installation process, as you'll be climbing ladders, working on your roof, and dealing with. Installing solar panels on your roof isn't just about securing them in place—it's also about getting them up there without breaking your back (or the panels). If you're planning to DIY your solar project, make sure you consider this part of the process. They have both electrical components and rooftop labor.
