# Is solar tube power generation good

## Overview

---

Solar tubes deliver exceptional ROI with 5-10 year payback periods: A typical 14-inch solar tube eliminates 300 watts of artificial lighting during daylight hours, saving \$136-\$204 annually at 2025 electricity rates of \$0. 17/kWh, while costing only \$600-\$1,500 installed. Also known as tubular skylights or sun tunnels, solar tubes give you an unobtrusive way to brighten the darker areas of your home with soft, natural light. The standard solar tube is a tube of polished sheet metal installed in the roof to channel sunlight into the house's interior. They're most. Over the years, solar tube lighting systems have become popular modern lighting solutions. They work by collecting light through a dome installed on the roof and reflecting it down a highly reflective tube into an interior. To determine if a solar tube is effective or ineffective, several critical factors need to be examined and assessed.
