# Is wind power generating capacity high now

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

## Overview

---

According to preliminary statistics published today by the World Wind Energy Association, global wind power capacity has now reached 1'173'581 Megawatt – well below the estimates published by WWEA in autumn 2024. New solar and wind capacity additions in November were the second highest in 2025 and accounted for 93% of that month's total. Solar continues to dominate new capacity additions and has held the lead among all energy sources for 27 consecutive months, according to data released by the Federal. • Total capacity exceeds 1'174 Gigawatt, • 121 Gigawatt added in 2024, slightly less than the last year • Dramatic 18% decline outside China • Annual growth rate falls from 13,0% to 11,5% • China installs 87 Gigawatt, 72% of new global capacity • Brazil becomes second largest market and joins top 5. U. Wind Power 2025 drives record capacity additions, with FERC data showing robust renewable energy growth, IRA incentives, onshore and offshore projects, utility-scale generation, grid integration, and manufacturing investment boosting clean electricity across key states. The GWEC Global Wind Report 2025 reviews the industry's 2024 performance and outlines the path to accelerated growth. The vast majority of new installations.

## Is wind power generating capacity high now

---

### U.S. Wind Power 2025: Capacity, IRA, Renewable Growth

According to data from the Federal Energy Regulatory Commission (FERC), wind energy accounted for 30.1% of the new electricity capacity added in January 2025, and as the most-used renewable

...

---

### FERC: Renewables made up 88% of new US power generating ...

Renewables accounted for 88% of all new generating capacity to the end of November, while natural gas added just 11.8%, reports FERC.

### Global Statistics

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

## The Future of Wind Energy: Insights From the GWEC Global Wind ...

Industry Growth Technological progress and policy backing continue to boost wind projects worldwide. In 2024, the global wind industry installed a record 117 GW of new capacity, edging past the 116.6 ...

## Solar and wind make up 90% of new US electricity capacity so far this ...

A review by the SUN DAY Campaign of data released by the Federal Energy Regulatory Commission (FERC) reveals that the combination of solar and wind accounted for 90% of new U.S. ...

## Wind Energy Growth , Energy Markets & Planning

Just over 4 gigawatts (4,000 megawatts) of new wind power capacity was installed in the U.S. in 2024, down from recent years. Output from 154 gigawatts of installed wind now makes up 10.3% of the ...

## Wind industry installs record capacity in 2024 despite policy instability

23 April, London , The Global Wind

Energy Council's flagship Global Wind Report released today shows that 2024 was a record year for new capacity, with 117 GW of wind energy installed across the world.

## Key US wind power trends and metrics to track , Reuters

Current installed wind generation capacity in the U.S. is roughly 152 gigawatts (GW), according to the U.S. Energy Information Administration (EIA). That capacity is up 46% from 2019, ...

## U.S. wind generation hit record in April 2024, exceeding coal-fired

Installed wind power generating capacity has increased substantially in the United States over the last 25 years, growing from 2.4 gigawatts (GW) in 2000 to 150.1 GW in April 2024.

## Wind Power Breaks Records in 2024, Paving the Way for a Greener ...

The year's growth, 109GW from onshore wind and 8GW from offshore, has pushed total global wind capacity to 1,136GW, now spanning every continent. In 2024

alone, wind turbines were installed in ...
