Lithium battery energy storage quality accident

Overview

18, 2025) -- Heavy weather and an improperly secured cargo of lithium-ion battery energy storage system (BESS) units led to two fires aboard the 410-foot-long cargo vessel Genius Star XI as it was transiting the North Pacific Ocean on Christmas Day 2023, causing. WASHINGTON (Dec. There are two tables in this database: Stationary Energy Storage Failure Incidents - this table tracks utility-scale and commercial and industrial (C&I) failures. Other Storage Failure. Cargo vessel Genius Star XI on Febru, after the fires. A perfectly normal Tuesday at a solar farm in Arizona. Suddenly, smoke starts. Since this series was first issued, there have been at least sixteen further incidents of BESS failures¹ around the world that have resulted in fires and damage to property, although there are no reports of significant injuries. As shown in Figure 1, some 10-15 incidents are reported each year.
