Long-term mobile energy storage containers for Copenhagen data center

Overview

Through these collaborations, DaCES seeks to ensure a long-term, focused and coordinated effort between all relevant players in areas of technology such as thermal energy storage, battery technology, system integration and Power-to-X. Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new. We are developing battery storage projects from green field to construction and into operations. New project: Cartesian will deliver a cold thermal storage unit to the Technical University of Denmark (DTU) in Copenhagen. Transforming agricultural waste into low-cost sodium-ion battery anodes.
