Energy Management in Residential Microgrid Based on Non ...

Recently, various strategies for energy management have been proposed to improve energy efficiency in smart grids. One key aspect of this is the use of microgrids. To effectively manage energy in a ...

Edge-Intelligent Smart Microgrid for Load Prediction and ...

Adverse weather is a leading cause in the disruption of transmission and distribution of electricity. A smart microgrid (SMG) seeks to improve a grid's readiness in inclement weather ...

A Microgrid Energy Management System Based on Non-Intrusive Load

Non-intrusive load monitoring (NILM) enables to understand the appliance-level behavior of the consumers by using only smart meter data, and it mitigates the requirements such as high ...

Energy Management in Residential Microgrid Based on Non-Intrusive Load

The concept of load disaggregation through non-intrusive load monitoring (NILM) is emerging as a cost-effective solution to optimize energy utilization in these systems without the need ...

Energy management system for multi interconnected microgrids ...

Applying a load-shifting technique-based load management approach to reduce the operational costs of a multi-interconnected microgrid during both grid-connected and islanded ...

Application of IoT and Non-Intrusive Load Monitoring ...

Please cite this article as: Esmaeili Shayan M. Application of IoT and non-intrusive load monitoring techniques in microgrid energy management and monitoring systems, Iranica Journal of ...

Load frequency control in renewable based micro grid with Deep ...

This paper introduces a novel control strategy to optimise the load frequency model in a microgrid (MG) with vehicle-to-grid interactions using Particle Swarm

Optimisation - deep Artificial ...

**Microgrids Control Strategies and Real-Time Monitoring ...**

Among Internet of Things (IoT) technologies, real-time monitoring, remote control, and predictive analytics contribute to MGs' efficiency [6,7]. The IoT facilitates easy communication ...

**Microgrid energy management and monitoring systems: A**

In islanded mode, the microgrid disconnects from the main grid and relies on distributed energy resources (DERs) to supply load (Sen and Kumar, 2018; Ortiz et al., 2019). In all forms of ...
