Mozambique base station construction 5 times

Support Customized Product

Overview

Starlink is set to launch a ground station in Mozambique by the end of March. From the gas fields of Cabo Delgado to the deep-water ports of Nacala and Beira, the nation's skyline of cranes, rigs and turbines signals more than construction — it marks a transformation. After years of volatility and regional instability, 2025 has brought a renewed sense of momentum, with many populated rural areas. That's primarily because it isn't economically feasible to build conventional base stations in challenges need to be overcome. That means Mozambique is actively pursuing a range of major infrastructure projects across various sectors to drive economic growth, improve connectivity, and enhance the quality of life for its citizens. The Total Project Cost was of circa USD 200 Million. Like other satellite networks, Starlink, run by SpaceX, needs ground stations to connect users to the. Mozambique, a southeastern African nation blessed with vast natural resources, holds the top spot in the Southern African Power Pool (SAPP) for energy potential, boasting an estimated 187 gigawatts from coal, hydroelectricity, natural gas, solar, and wind (Mozambique Power Generation).
