## Overview

---

No upfront cost means installing solar panels without paying anything at the time of setup. Monthly payments replace a lump-sum down payment, letting homeowners adopt solar without immediate financial. Companies often offer “free” solar panels through leases or power purchase agreements (PPAs), where they install and maintain the panels at no upfront cost. “Free” solar panels can result in initial savings on your energy bills, but in the long run, the savings may not be as significant as owning. Luckily, there are ways to get solar panels installed with little to no money down. Exploring these options helps grasp how solar investments become accessible. Once your solar panels are installed and functioning, you begin to pay the monthly rate for your solar system, which can be anywhere from 15% to 45% lower than your usual utility power rates.
