# **No need to pay electricity bills when installing solar power**

## Overview

---

Home solar panels can reduce your electric bill, but you'll still receive one, even if it reads zero in some months. » [MORE: See our picks for the year's best solar companies](#) How does billing work when you have solar?

The size of your electric bill after installing solar panels depends on your specific situation. Here's why, and how solar panels can. Your electric bill will indicate both the energy consumed from the grid and any surplus energy generated by your renewable setup, leading to the question: do you have to pay for electricity if you have solar panels?

This excess can often be returned to you through net metering, significantly. If you choose to install a grid-tied solar panel system, you will continue to receive a monthly electric bill from your utility company - but how much will that bill be?

In this piece, we'll review the primary factors determining how much you'll need to pay your utility company after installing a. Before installing solar panels, your electric bill will be based on the total amount of electricity you use from the grid. The amount of money you save on your electric.
