

Espay Solar Energy S.L.

North macedonia energy independence

Overview

Currently, renewable energy in North Macedonia contributes roughly 24% to the domestic energy mix, largely driven by hydropower. Yet, the vast, untapped potential of solar and wind energy remains the key to unlocking true energy independence and meeting the nation's ambitious. While the European Union has made significant strides—with renewable energy sources accounting for over 41% of its gross final energy consumption in 2024 and aiming for 42. This unprecedented expansion, driven by the European Union's Clean Energy Package, has led the country to achieve. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport. Construction of the gas interconnector with Greece and an. Since assuming office in June 2024, Macedonia's new government, led by Prime Minister Hristijan Mickoski, has introduced a proactive and ambitious energy agenda, announced by the establishment of a new Ministry of Energy, Mining, and Mineral Resources.
