# **Photovoltaic panels placed flat on the roof**

## Overview

---

Yes, you can absolutely install solar panels on flat roofs. In fact, flat roof installations often outperform sloped roof systems when properly designed and installed. Most sloped roofs are in this angle. Optimal Performance Through Flexibility: Flat roofs offer superior energy production potential compared to sloped roofs because panels can be positioned at the ideal tilt angle (15-40 degrees) and orientation regardless of building direction, often resulting in 10-15% higher energy yields. Ballast. Flat rooftops provide a practical, accessible canvas for solar energy projects.
