# **Photovoltaic sand control and energy storage in Inner Mongolia**

## Overview

---

This scene of integrated " photovoltaic power generation combined with desertification control" not only effectively halts the encroachment of sand, but also generates significant economic value, breathing new life into this once sand-plagued land. In recent years, Inner Mongolia has made all-out efforts to tackle the ecological challenges in the areas along the Yellow River, and has treated land. Aerial view of solar photovoltaic sand control in Hangjinqi, Inner Mongolia The comprehensive implementation plan of photovoltaic sand control in Hangjinqi of Inner Mongolia is an innovative ecological project, combining photovoltaic power generation and desert control, effectively promoting the. In 2010, Bayannur officially began to explore a new model of photovoltaic desert control, and the Guohua Dengkou 100-megawatt photovoltaic desert control and energy storage bidding project emerged under this background. " This poetic nickname reflects a profound shift. Driven by China's dual. In the heart of the Ulan Buh Desert, where harsh winds once swept sand into the Yellow River, vast fields of solar panels stretch across the horizon. Below them, a grid pattern made of straw anchors the soil, and desert shrubs thrive in the shade.

## Photovoltaic sand control and energy storage in Inner Mongolia

---

### Integrated solar model fixes shifting sands

This "photovoltaic plus desertification control" model in the Inner Mongolia autonomous region's Dengkou county has been key in China's battle against desertification.

---

### The State Power Investment Corporation's 550MW ...

Recently, the sand control and wind power photovoltaic integration project in Zhalute Banner, Tongliao City, Inner Mongolia officially started!

### "Photovoltaic + Desert Control" Fortifies the Ecological Defense Line

In 2010, Bayannur officially began to explore a new model of photovoltaic desert control, and the Guohua Dengkou 100-megawatt photovoltaic desert control and energy storage bidding ...

---

### Sandy wasteland to green valley:

## Inner Mongolia's new energy drive

This scene of integrated " photovoltaic power generation combined with desertification control" not only effectively halts the encroachment of sand, but also generates significant economic ...

**1mwh** (500kw/1mw)

AIR COOLING  
ENERGY STORAGE CONTAINER

## PV projects boost local ecological rehabilitation, economic growth in

In recent years, Inner Mongolia has carried out integrated projects for sand prevention and control as well as wind and photovoltaic power to advance the improvement efforts in Kubuqi Desert.

## From Desert to Powerhouse: Inner Mongolia's Photovoltaic Projects ...

Driven by China's dual priorities of environmental rehabilitation and renewable energy development, Inner Mongolia has become a national model for combining photovoltaic (PV) ...

## Inner Mongolia Hangjinqi Solar Photovoltaic Sand Control ...

In 2025, 1 million kilowatts of photovoltaic array laying will be completed, and 100,000 mu of sand barrier project will be launched

simultaneously. In 2026, it is expected to complete the ...

## Photovoltaic project turns Inner Mongolia's desert into 'blue seas' of

An aerial drone photo taken on Jshows an integrated sand control and photovoltaic project at a state forestry area on the edge of Ulan Buh Desert in Linhe District of ...

## Kubuqi Sand Control PV Power Project

Boland have senior EPC qualification, EPC PV Power Project, wind farm and energy storage project, undertake the design, procurement, construction and commissioning services of the project, ...

## Installed target 89 GW! Inner Mongolia Releases Action Plan for

According to the document notice, in order to cooperate with the "Three North" Phase VI and other ecological

control projects, the large-scale development of photovoltaic sand control in desert and ...
