

Espay Solar Energy S.L.

Senegal installs solar power generation for home use

Overview

Independent power producer, Africa REN, has commissioned a 20MW of solar PV power plant with a 10MW/20MWh battery energy storage system (BESS) in Senegal. Basically, this sustainable microgrid is a shipping container plated with 144 solar panels, containing enough battery storage to create a predictable, stable source of energy. Solar-powered generators have revolutionized the way rural communities in Senegal access light and energy. Through the innovative efforts of Senegalese students and their teacher, a project initially focused on a solar-powered car has evolved into what is now known as a “Gazelle Village. This is part of the country's national strategy to achieve universal electricity access by 2029. With 40% of rural households lacking reliable electricity access and urban electricity prices rising by 25% since 2023, Senegalese families and businesses are asking: How can we achieve energy independence without breaking the bank?

Solar panel installations have surged by 63% year-on-year, but.
