Should photovoltaic panels be laid horizontally or vertically

Overview

Most homes achieve better results with a horizontal orientation, especially when aiming to capture the most sunlight on the panels. Research shows that panels installed at typical roof angles can generate over 90% of the optimal energy annually. Still, you should be strategic with placement. Some things you need to consider include: There's no difference in the output solar panels produce regarding. In this Solar Panel Orientation Guide, we'll explore the factors that influence the efficiency of solar panels based on their orientation and help you decide the best setup for your needs.
