

**Espay Solar Energy S.L.**

# **Solar energy for the environment port louis**

## Overview

---

The SSP Assessment Report provides a roadmap for sustainable modernization, identifying solar photovoltaic (PV) energy as the most viable renewable source for Port Louis. The report also explores electrification of port equipment and onshore power supply—steps that could drastically cut emissions. Mauritius is exploring and developing alternative energy sources to diversify its energy mix: The island has a favourable solar regime, with an average annual radiation of approximately 6 kWh/m<sup>2</sup>/day. Certain regions experience annual average wind speeds of 8. This guide explores cutting-edge solar technologies, economic benefits, and real-world success stories - perfect for businesses, homeowners, and policymakers seeking renewable energy solutions in. The Municipality of Port Louis, capital of Mauritius, has recently confirmed its plan to turn Port Louis into a green city. Lord-mayor Mamad Kodabaccys made this new strategic direction clear during one of his recent speeches at the City Council Meeting. In association with its partner in. Solar energy comes directly from the sun.
