## Overview

---

What is the average cost of solar power per kilowatt hour (kWh) in the US today?

Currently, residential solar power often lands between \$0.15 per kWh, although utility-scale projects achieve even lower rates. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. The average cost per unit of energy generated across the lifetime of a new power plant. It is adjusted for inflation but does not account for differences in living costs between countries. NLR's PV cost benchmarking work uses a bottom-up. This typically translates to about \$2. This comprehensive guide will peel back the layers of solar pricing, moving beyond simple sticker price comparisons. 30 for electricity generation, depends on location, system size, and installation type.
